

LiveMUM

Start to Finish

Real-time CAD data

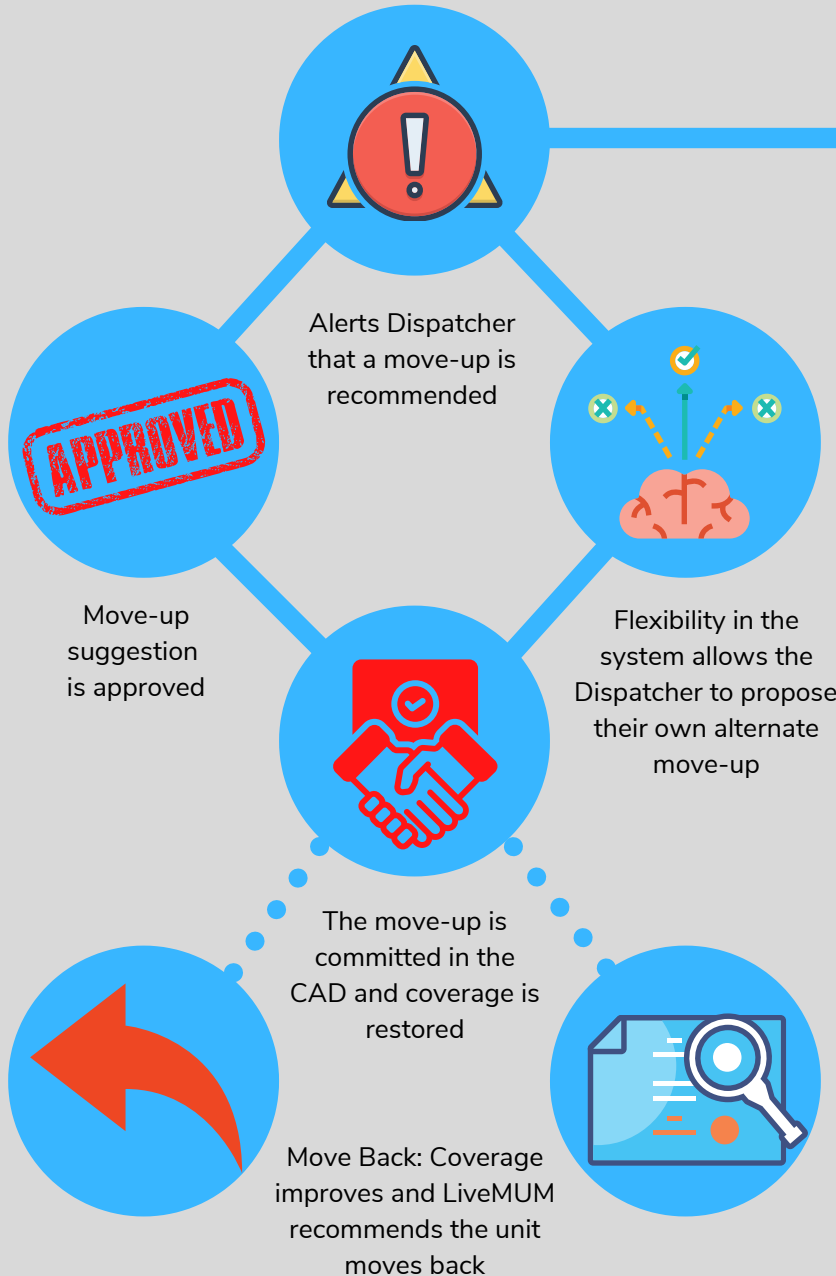

Compare Unit availability to baseline coverage standards

Combines in a real-time view of your coverage for the full picture

Identifies a coverage gap exists

LiveMUM Factors In Your Business Rules

Alerts Dispatcher that a move-up is recommended

Flexibility in the system allows the Dispatcher to propose their own alternate move-up

Move-up suggestion is approved

The move-up is committed in the CAD and coverage is restored

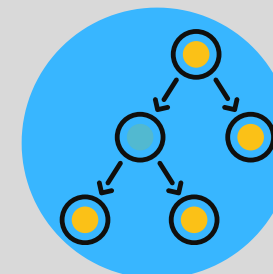

Move Back: Coverage improves and LiveMUM recommends the unit moves back

Conditions:
Set of rules set for a specific scenario or period of time

Posting Plans:
Specific coverage move-ups based on predetermined unit levels

Incident Driven Relocations:
Specific move-ups based on incident location

After-Action Analysis
